UNIVERSITY

VOCATIONAL SCHOOL OF TECHNICAL SCIENCES AT MERSIN
TARSUS ORGANIZED INDUSTRIAL ZONE

ELECTRONICS TECHNOLOGY

Dear Students,

Welcome to the website of the Mechatronics Program of the Electronics and Automation Department of Tarsus University Mersin Tarsus OSB Technical Sciences Vocational School. Through this website, you can access all current information about our department.

Mechatronics is a scientific discipline that encompasses all stages from the design to the final product of many intelligent devices, product and robot systems, especially in automotive, defense industry and biomedical applications. It offers its graduates a very wide range of job opportunities that encompass all the fields it covers. Thanks to these features, it is one of the most sought-after professions of today and the future.

Our main goal is to train qualified technicians who can work as mechatronics technicians to meet the rapidly changing and developing needs of the sector. In this context, we plan to experience the joy of preparing you for the future together with our expert faculty members and advanced laboratory facilities. We would be happy to see you, our valuable young people aiming to be a Mechatronics Technician, as a student of our department.

We wish you success,

Assistant Professor Abdulcelil Yüzer

Head of Department
