VOCATIONAL SCHOOL OF TECHNICAL SCIENCES AT MERSIN
TARSUS ORGANIZED INDUSTRIAL ZONE

FOOD TECHNOLOGY

Dear Students,

The food industry, which produces essential human needs, has been one of the least affected sectors even during crisis periods such as the pandemic we are experiencing. Due to its indispensable nature, the food industry is growing and developing rapidly every day. In particular, keeping up with rapidly changing and developing technologies creates strong competitive environments. To keep up with the increasing competition with the rapid advancement of technology, adapting innovation in the sector to production can be achieved with a good team. The need for qualified personnel to work in production is increasing day by day within this competitive environment. The production of high value-added, exportable foods that have a place in the international market will be possible with the training of qualified personnel in the food sector.

Mersin Tarsus OSB Technical Sciences Vocational School Food Technology Program aims to train successful individuals who are self-confident, entrepreneurial, know how to access information, have analytical thinking skills, have a sense of responsibility, and can serve the sector with its qualified and experienced academic staff and modern education.

- To equip students with the knowledge and skills necessary for a successful career in the food industry

- To develop students' critical thinking and problem-solving abilities

- To foster students' entrepreneurial spirit and innovation skills

- To instill in students a strong sense of ethics and responsibility

- To prepare students for leadership roles in the food industry

Graduates of the Mersin Tarsus OSB Technical Sciences Vocational School Food Technology Program will be well-prepared for a variety of careers in the food industry, including:

Department Head

Assistant Professor Sevgin Dıblan
