VOCATIONAL SCHOOL OF TECHNICAL SCIENCES AT MERSIN  
TARSUS ORGANIZED INDUSTRIAL ZONE

CHEMICAL TECHNOLOGY

Dear Students,

We are surrounded by Chemistry everywhere in life, and the place of Chemistry in our lives is increasing day by day. Innovations and technologies in chemical production, wastes generated at the end of consumption and their recycling efforts lead to the gradual growth of the chemical sectors. Our country, along with the rest of the world, is keeping up with these innovations, so there is a need for professionals in the industry who have the ability to translate theoretical knowledge into practical work. Mersin Tarsus OIZ Vocational School of Technical Sciences Chemical Technology Program is designed to provide students with competent knowledge in the field of Chemistry and Chemical technology in our country's industry, especially in the regional industry,

with the ability to transform their knowledge and experience into practical applications, open to development as directed by both social necessity and technological innovations, productive, It was created to train technical human resources who are entrepreneurs and care about environmental health.

Assistant Professor Fatih Tezcan
