VOCATIONAL SCHOOL OF TECHNICAL SCIENCES AT MERSIN
TARSUS ORGANIZED INDUSTRIAL ZONE

MACHINERY

Dear Students,

The competitiveness of the economy in the manufacturing sector has increased in parallel with the development of the machine building industry in our country, as well as all over the world. Reorganizing and restructuring the machinery manufacturing industry is of great importance in terms of revitalizing national production, encouraging exports and ensuring technological progress. With developing technology, machine use and need are increasing rapidly. Machine production plays a key role in increasing the applicability and efficient use of technological developments. For this reason, the need for qualified machine technicians is increasing in line with these developments in the sector. As Mersin Tarsus OSB Technical Sciences

Vocational School Machinery Program, our biggest goal is to prepare our students for the future by equipping them with professional knowledge and skills in the field of machinery with our qualified and experienced academic staff.
