

TARSUS
UNIVERSITY

FACULTY OF ENGINEERING

MECHANICAL ENGINEERING

Dear Students,

Mechanical engineering offers the most extensive employment opportunities among engineering disciplines due to its wide range of applications, encompassing design, manufacturing, management, marketing, and various sectors such as machinery, manufacturing, energy, aerospace, defense, automotive, construction, marine, health, heating, cooling, and air conditioning.

Tarsus University's Department of Mechanical Engineering was established to cultivate mechanical engineers who are equipped to respond to technological advancements and the ever-increasing and diversifying demands of the industry. Our graduates are characterized by their entrepreneurial spirit, problem-solving skills, leadership qualities, commitment to continuous improvement, adherence to ethical values, and proficiency in foreign languages.

Our department strives to provide you with a rich learning experience grounded in both theory and practice, supported by our dynamic and accomplished academic staff. Our curriculum, which includes 30% English-language instruction, integrates production and design, enabling you to gain valuable internship and career opportunities through collaborations with leading companies.

We invite you to join us in Tarsus, an industrial city steeped in history and cultural richness, to become the future leaders of mechanical engineering on a national and international scale.

Professor Funda Kahraman

Head of Department
