

Dear Students,

Welcome to the website of the Mechatronics Program of the Department of Electronics and Automation at Tarsus University Mersin Tarsus OSB Vocational School of Technical Sciences. You can access all the latest information about our department through this website.

Mechatronics is a branch of science that covers all stages from the design to the final product of many systems, especially smart devices, product and robot systems, automotive, defense industry and biomedical applications. It offers its graduates a very wide range of job opportunities that encompass all the fields it covers. Thanks to these features, it is one of the most sought-after professions of today and the future.

Our main goal is to train qualified technicians who can work as mechatronics technicians in the rapidly changing and developing needs of the sector. In this context, we plan to experience the happiness of preparing you for the future together with our expert faculty members and advanced laboratory facilities. We would be happy to see you, our valuable young people aiming to be Mechatronics Technicians, as a student of our department.

We eagerly await the days when we will have the opportunity to meet our valuable candidate students face to face.

I wish you success,

Assistant Professor Abdulcelil Yüzer

Head of Department
